

Della Townships partners with IIT Madras

NT BUREAU
CHENNAI, MARCH 20

Della Townships has partnered with Indian Institute of Technology Madras to develop microalgae-powered carbon sequestration technologies, marking a significant step toward climate-responsive urban development.

Led by Jimmy Mistry, the initiative will integrate innovations such as algae-based carbon capture systems, bio-ponds, and green façade solutions into luxury townships.

The collaboration adopts an open-source model, allowing wider global adoption of the technologies.

The partnership will focus on research, scalability, and real-world implementation, positioning Della Townships at the forefront of sustainable and regenerative real estate in India.
